

CONNECTING YOUR STUDENTS TO PERSONALIZED EDUCATION, TRAINING AND SUPPORT

The CVi Connect PRO iPad App

- Cutting edge technology with Look Detection
- Provides learning Activities
- Access to Activity data
- Supports multiple students
- Supports all Phases of the CVI Range

CVi Connect is a...

community of CVI professionals, utilizing cutting-edge technology, that offer hope and confidence in the form of personalized education, training and support for children with Cortical Visual Impairment.

The Team

The team includes teachers of the visually impaired (TVIs), technical staff, and Christine Roman-Lantzy. Dr. Roman-Lantzy is a world leader in the understanding, assessment and intervention strategies for CVI.

The Technology

The CVi Connect application uses the camera inside of the iPad to detect whether the child is looking at or away from the activity, has their eyes open or shut, and is smiling. The software leverages the data to suggest more advanced exercises.

The Education

The CVi Connect community includes parents, TVIs, technology experts and medical professionals, all providing content via our blog, social media outlets and webinars, to create a robust learning environment
